

Nemeth Composite Al-Carbon Competition Javelins - 800 g

Nemeth Classic 95 m hard composite 800 g 2600 mm / Ø 30 mm **1012 €**

The most significant development from Nemeth Javelins, Olympic quality competition javelin.

Minimal vibration due to the hard carbon fiber coating.

The aerodynamically optimal shape of the javelin shaft made with a Nemeth "front lift" javelin head makes the Nemeth Classic 95m hard composite javelin **a true masterpiece**.

Firm grip, excellent visibility - light reflective text. Extremely durable.

Recommended for technically skilled, physically capable throwers. Requires accurate release.

new

Nemeth Classic 90 m medium composite 800 g 2600 mm / Ø 30 mm **912 €**

Nemeth Javelins' world (1999) and Olympic champion (2004) competition javelin with medium carbon fiber coating.

Ultra-precise shape of the javelin shaft made with a Nemeth "front lift" javelin head.

Nemeth Javelins' most popular Olympic quality competition javelin received a medium carbon fiber coating, which results in decreased vibration and exceptionally effective utilization of driving power (energy transfer).

Firm grip, excellent visibility - light reflective text. Extremely durable.

Recommended for technically skilled, physically capable throwers. Requires accurate release.

new

Nemeth Club 85 m medium composite 800 g 2600 mm / Ø 30 mm **754 €**

Ultra-precise shape of the javelin shaft made with a less sensitive blunt Nemeth javelin tip.

The excellent Nemeth Club 85m Olympic quality competition javelin received a medium carbon fiber coating, which results in decreased vibration and exceptionally effective utilization of driving power (energy transfer), even in case of less accurate release.

Firm grip, excellent visibility - light reflective text. Extremely durable.

Recommended for technically skilled throwers with international level results. Good compensation in case of less accurate release.

new

Nemeth Standard 70 m soft composite 800 g 2600 mm / Ø 30 mm **535 €**

Precise shape of the javelin shaft made with an inaccuracy tolerant, narrow Nemeth javelin tip.

The excellent Nemeth Standard 70m competition javelin received a soft carbon fiber coating, which results in decreased vibration and exceptionally effective utilization of driving power (energy transfer), even in case of inaccurate release.

Firm grip, excellent visibility - light reflective text. Very durable.

Recommended for technically intermediate or advanced throwers with developing results. Good compensation in case of inaccurate release.
